

**METHOD, SYSTEM, AND COMPUTER PROGRAM PRODUCT FOR SAVING A
SEARCH RESULT WITHIN A GLOBAL COMPUTER NETWORK**

ABSTRACT OF THE DISCLOSURE

In one embodiment, on a display device, within at least one web browser window, at least one information handling system: displays a result of a search by a website in response to a search term query specified by a user; displays a list of folders; and highlights at least a portion of the displayed result of the search by the website. In response to a command from the user via the web browser window, the information handling system saves the highlighted portion in a folder that is selected by the user from among the displayed list of folders.
